CONTENTS

Volume 35, Issue Nos. 1–10 (1992)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Efficient Formulation of Robust Hybrid Elements using Orthogonal Stress/Strain Interpolants and Admissible Matrix Formulation: K. Y. Sze 1

Optimal Structural Design with Damping Constraint Limitations: W. Suweca and L. Jezequel 21

A Stabilized 9-Node Non-linear Shell Element: H. Kebari and A. C. Cassell 37

Genuinely Resultant Shell Finite Elements Accounting for Geometric and Material Non-linearity: J. Chróścielewski, J. Makowski and H. Stumpf 63

Shape Functions and Integration Formulas for Three-dimensional Finite Element Analysis: G. Bedrosian 95

Elastostatic Analysis of Infinite Solids using Finite Elements: S. K. Sharan 109

Design and Optimization of Airfoils in Non-stalling Incompressible Flow with a Prescribed Range of the Angle of Attack: A. M. Elizarov and D. A. Fokin. 121

A Finite Element Formulation of the Large Sliding Contact: G. J. M. A. Schreppers, W. A. M. Brekelmans and A. A. H. J. Sauren 133

An Adaptive *h*-Refinement using Transition Element for Plate Bending Problems: C.-K. Choi and Y.-M. Park 145

Diffusion Problems using Transient Discrete Source Superposition: S. P. Walker. . . . 165

Fracture Mechanics Weight Functions in Three Dimensions: Subtraction of Fundamental Fields: R. Bains, M. H. Aliabadi and D. P. Rooke 179

Accelerated Bisection Techniques for Tri- and Quindiagonal Matrices: G. Baker . . . 203

CONFERENCE DIARY 219

Indexed or abstracted by 'Abstract Jnl. in Earthquake Engineering', 'Applied Mechanics Review', 'Boundary Element Abstracts', 'Cambridge Scientific Abstracts', 'CITIS-Civil Engineering Abstracts', 'Compumath Citation Index', 'Current Contents', 'Engineering Index Inc', 'Eng. Societies Library', 'BHRA Fluid Engineering Centre', 'Geodex', 'Geotechnical Abstracts', 'Indian Society of Earthquake Technology', 'INSPEC', 'International Petroleum Abstracts', 'Mathematical Reviews', 'Mechanics', 'Newsletter of Engineering Analysis Software', 'Science Citation Index', 'SCISEARCH Database', 'Shock and Vibration Digest', 'Zentrablatt fur Mathematik'.

Issue No. 2

Newton-like Methods with Limited Storage, for the Solution of Elasto-viscoplasticity Problems: M. B. Reed 223

The Iterative Solution of Taylor–Galerkin Augmented Mass Matrix Equations: D. Ding, P. Townsend and M. F. Webster 241

A Galerkin Symmetric Boundary-element Method in Elasticity: Formulation and Implementation: S. Sirtori, G. Maier, G. Novati and S. Miccoli 255

Shear Deformability of Thin-walled Beams with Arbitrary Cross Sections: G. Romano, L. Rosati and G. Ferro 283

Boundary Element Approach for Dynamic Poroelastic Problems: J. Dominguez . . . 307

Effect of Warping–Pretwist Coupling on the Natural Vibration of Torsionally Clamped–Pinned Thin-walled Open-profile Bars: O. G. McGee 325

A BEM Approach to Model Heat Flow During Crystallization: M. Erhun and S. G. Advani 351

On the Performance of Two Tangent Operators for Finite Element Analysis of Large Deformation Inelastic Problems: A. F. M. Arif and N. Zabaras 369

A Multicorner Variable Order Singularity Triangle to Model Neighbouring Singularities: S. K. Maiti 391

Vibrations of Cantilevered Skewed Plates with Corner Stress Singularities: O. G. McGee, A. W. Leissa and C. S. Huang 409

Object Oriented Programming of the Finite Element Method: R. I. Mackie 425

BOOK REVIEWS 437

CONFERENCE DIARY 439

Issue No. 3

The Multiple Reciprocity Method Applied to Thermal Stress Problems: A. C. Neves and C. A. Brebbia 443

A General Explicit or Semi-explicit Algorithm for Compressible and Incompressible Flows: O. C. Zienkiewicz and J. Wu 457

Efficient and Reliable Accelerated Constant Stiffness Algorithms for the Solution of Non-linear Problems: C.-N. Chen 481

New Variational Formulations for Minimal Surfaces: B. Tabarrok and L. Tong 491

A Shear Locking Free Isoparametric Three-node Triangular Finite Element for Moderately-thick and Thin Plates: H. R. H. Kabir 503

Gradient-dependent Plasticity: Formulation and Algorithmic Aspects: R. De Borst and H.-B. Mühlhaus 521

The C^0 Structural Finite Elements Reformulated: D. Briassoulis 541

Analysis and Evaluation of Singular Integrals by the Invariant Imbedding Approach: D. Rosen and D. E. Cormack 563

Error Estimators Using Global–Local Methods: K. M. Mao and C. T. Sun 589

Conjugate Direction Methods for Helmholtz Problems with Complex-valued Wavenumbers: K. D. Paulsen, D. R. Lynch and W. Liu 601

A Note on the Grid Movement Induced by MFE: P. A. Zegeling and J. G. Blom . . . 623

ANNOUNCEMENT 637

CONFERENCE DIARY 638

Issue No. 4

PREFACE iii

Spacecraft Thermal Modelling: J. H. Chin, T. D. Panczak and L. Fried. 641

Adaptive Explicit and Implicit Finite Element Methods for Transient Thermal Analysis: E. J. Probert, O. Hassan, K. Morgan, J. Peraire 655

Some Recent Trends and Developments in Finite Element Analysis for Incompressible Thermal Flows: B. Ramaswamy and T. C. Jue. 671

A Physical Interpretation of Conservative and Non-Conservative Finite Element Formulations of Convection-type Problems: S. Del Giudice, G. Comini and C. Nonino 709

Viscous Heating in Forced Convective Heat Transfer Across a Circular Cylinder at Low Reynolds Number: B. Sunden 729

A New Unconditionally Stable Fractional Step Method for Non-linear Coupled Thermomechanical Problems: F. Armero and J. C. Simo. 737

Real Contact Mechanisms and Finite Element Formulation – A Coupled Thermomechanical Approach: G. Zavarise, P. Wriggers, E. Stein and B. A. Schrefler . . 767

A Finite Element Model for the Simulations of Mould Filling in Metal Casting and the Associated Heat Transfer: A. S. Usmani, J. T. Cross and R. W. Lewis 787

Numerical Simulation of Forming Processes using a Coupled Fluid Flow and Heat Transfer Model: M. P. Reddy and J. N. Reddy. 807

Inverse Stefan Problem: Tracking of the Interface Position from Measurements on the Solid Phase: C. Bénard and A. Afshari 835

The Conjugate Formulation of a Radiation Induced Transient Natural Convection Boundary Layer: X. Li and P. Durbetaki 853

Modelling and Computation of Slow-burning Pyrotechnical Compositions using a Fixed Mesh Finite Element Formulation: D. Loyd, G. Andersson and M. Karlsson 871

Development of a Monte Carlo Method for Numerical Analysis on Radiative Energy Transfer through Non-grey-gas Layer: H. Taniguchi, K. Kudo, M. Otaka, M. Sumarsono and M. Obata 883

An Element Formulation for the Classical Finite Difference and Finite Volume Method Applied to Arbitrarily Shaped Domains: A. Lahrmann 893

A Knowledge-based *a-Priori* Approach to Mesh Generation in Thermal Problems: E. Kang and K. Haghighi 915

A Finite Element Approach for Modelling Metal Flow and Pressurised Solidification in the Squeeze Casting Process: D. T. Gethin, R. W. Lewis and M. R. Tadayon. . . . 939

CONFERENCE DIARY 951

Issue No. 5

A Simple Class of Finite Elements for Plate and Shell Problems. I: Elements for Beams and Thin Flat Plates: R. Phaal and C. R. Calladine 955

A Simple Class of Finite Elements for Plate and Shell Problems. II. An Element for Thin Shells, with only Translational Degrees of Freedom: R. Phaal and C. R. Calladine. . 979

Direct Formulation of a Hybrid 4-node Shell Element with Drilling Degrees of Freedom: M. A. Aminpour 997

A Stabilization Procedure by Line-search Computation for First Order Approximation Strategies in Structural Optimization: R. Mahnken, E. Stein and D. Bischoff. . . . 1015

Implementation of a Lamina-based Constitutive Relationship for Analysing Thick Composites: E. Zywicz 1031

Use of Boundary Element Method for the Determination of Tool Shape in Electrochemical Machining: S. Das and A. K. Mitra. 1045

Tabu Search Method with Random Moves for Globally Optimal Design: N. Hu . . . 1055

An Alternative Approach to Shape Design Sensitivity Analysis: Z. Zhao and R. A. Adey 1071

Non-linear Finite Strip Analysis of Rectangular Laminates Under End Shortening, using Classical Plate Theory: D. J. Dawe, S. S. E. Lam and Z. G. Azizian 1087

Theory and Finite Element Formulation of Rubberlike Membrane Shells using Principal Stretches: F. Gruttmann and R. L. Taylor 1111

Configuration Design Sensitivity Analysis of Built-up Structures Part I: Theory: S.-L. Twu and K. K. Choi 1127

CONFERENCE DIARY 1151

Issue No. 6

Localized Collapse of Shells of Revolution Using a Local–Global Strategy: R. V. Ravichandran, P. L. Gould and S. Sridharan 1153

A Finite Element Method for the Probabilistic Creep of Solids: T. J. Delph and J. E. Yukich 1171

Finite Element Dispersion Analysis for the Three-dimensional Second-order Scalar Wave Equation: N. N. Abboud and P. M. Pinsky 1183

Reduction of Equilibrium, Compatibility and Flexibility Matrices, in the Force Method: S. Pellegrino, A. S. K. Kwan and T. F. Van Heerden 1219

Some Theoretical Aspects in Computational Analysis of Adhesive Lap Joints: P. Destuynder, F. Michavila, A. Santos and Y. Ousset 1237

Elastoplastic Analysis Using the 14-node Brick Element Family: I. M. Smith and D. J. Kidger 1263

An Efficient Method for the Two-dimensional Elastostatic Boundary Element Method: M. Yokoyama and T. Zaita 1277

Computational Model for 3-D Contact Problems with Friction Based on the Penalty Method: D. Perić and D. R. J. Owen 1289

Preconditioning Techniques for Non-symmetric Matrices with Application to Temperature Calculations of Cooled Concrete: A. van der Ploeg 1311

A Finite Element Method for Domains with Corners: D. Givoli, L. Rivkin and J. B. Keller 1329

LETTER TO THE EDITOR. 1347

AUTHORS' REPLY 1349

ANNOUNCEMENT 1350

Issue No. 7

How to Recognize the Order of Infinitesimal Mechanisms: a Numerical Approach: G. Salerno. 1351

Finite Element Asymptotic Analysis of Slender Elastic Structures: a Simple Approach: R. Casciaro, G. Salerno and A. D. Lanzo 1397

Creep Deformation Structural Analysis Using an Efficient Numerical Algorithm: R. G. Whirley and G. A. Henshall 1427

Hybrid Trefftz Plane Elasticity Elements with *p*-Method Capabilities: J. Jirousek and A. Venkatesh 1443

A Method for Direct Evaluation of Singular Integral in Direct Boundary Element Method: H. Liao and Z. Xu 1473

Solutions to Shape and Topology Eigenvalue Optimization Problems using a Homogenization Method: A. R. Díaz and N. Kikuchi 1487

An Explicit Unconditionally Stable Variable Time-step Method for One-dimensional Stefan Problems: M. Zerroukat and C. R. Chatwin 1503

Partia. Mixed 3-D Element for the Analysis of Thick Laminated Composite Structures: C.-L. Liao and J.-S. Tsai 1521

ANNOUNCEMENTS 1541

CONFERENCE DIARY 1543

Issue No. 8

Seismic Crack Propagation Analysis of Concrete Structures Using Boundary Elements: O. A. Pekau and V. Batta 1547

A Time Integration Algoritnm for Elasto-viscoplastic Cubic Crystals Applied to Modelling Polycrystalline Deformation: A. M. Maniatty, P. R. Dawson and Y.-S. Lee 1565

On the Limits of Finite Element Perfectability: R. H. MacNeal 1589

On a Simple Triangular Reissner/Mindlin Plate Element Based on Incompatible Modes and Discrete Constraints: J.-L. Batoz and I. Katili 1603

The Use of Orthogonal Projections to Handle Constraints with Applications to Incompressible Four-node Quadrilateral Elements: U. Hueck and H. L. Schreyer 1633

A Multigird Method for the Generalized Symmetric Eigenvalue Problem: Part I Algorithm and Implementation: T. Hwang and I. D. Parsons 1663

A Multigrid Method for the Generalized Symmetric Eigenvalue Problem: Part II Performance Evaluation: T. Hwang and I. D. Parsons 1677

On the Consideration of Unilateral Contact and Friction in Cracks. The Boundary Integral Method: P. S. Theocaris and P. D. Panagiotopoulos 1697

A Finite Element Approach to Kinetic Energy Discretization of Deformable Bodies in Quashi-rigid Motion: P. Lucibello and W. D'Ambrogio 1709

ANNOUNCEMENTS 1731

CONFERENCE DIARY 1734

Issue No. 9

Use of 'Simple Solutions' for Boundary Integral Methods in Elasticity and Fracture Analysis: E. Lutz, A. R. Ingraffea and L. J. Gray 1737

Seismic Response Analysis of Alluvial Valley with Two Dipping Layers by a Boundary Element–Finite Element Coupling Method: K. Abe and Y. Yoshida 1753

Boundary Element Analysis of Thin Plates Internally Bounded by Rigid Patches: G. A. Hartley, A. Abdel-Akher and P. Chen 1771

Polynomial Particular Solutions Based Boundary Element Analysis of Acoustic Eigenfrequency Problems: S. T. Raveendra and P. K. Banerjee 1787

Implementation of Mixed Time Integration Techniques on a Vectorized Computer with Shared Memory: T. Belytschko and N. D. Gilbertsen 1803

A Consistent Co-rotational Formulation for Shells Using the Constant Stress/Constant Moment Triangle: X. Peng and M. A. Crisfield. 1829

An Enthalpy Control-Volume–Unstructured-Mesh (CV–UM) Algorithm for Solidification by Conduction Only: P. Chow and M. Cross 1849

Three-dimensional 8-Node and 20-Node Refined Hybrid Isoparametric Elements: W. Chen and Y. K. Cheung 1871

Thermoelastic Stability of Trusses with Temperature-dependent Constitutive Relations: P. Wriggers and S. Reese. 1891

Three-dimensional Fracture Simulation with a Single-domain, Direct Boundary Element Formulation: L. F. Martha, L. J. Gray and A. R. Ingraffea 1907

ANNOUNCEMENTS 1923

CONFERENCE DIARY 1925

Issue No. 10

Projection Methods in Flexible Multibody Dynamics. Part I: Kinematics: A. A. Shabana, Y. L. Hwang and R. A. Wehage 1927

Projection Methods in Flexible Multibody Dynamics. Part II: Dynamics and Recursive Projection Methods: R. A. Wehage, A. A. Shabana and Y. L. Hwang 1941

An Automatic Adaptive Refinement Finite Element Procedure for 2D Elastostatic Analysis: C. K. Lee and S. H. Lo 1967

Coupling Finite Elements and Magnetic Networks in Magnetostatics: D. A. Philips . . 1991

The Modelling of Aerodynamic Flows by Solution of the Euler Equations on Mixed Polyhedral Grids: A. J. Peace and J. A. Shaw 2003

Effect of Cross-sectional Warping of Anisotropic Sandwich Laminates Due to Dynamic Loads Using a Refined Theory and C^0 Finite Elements: Mallikarjuna and T. Kant . . 2031

A Consistent Model for First-order Moderate Rotation Plate Theory: E. Sacco 2049

Direct Evaluation of Singular Boundary Integrals in Two-dimensional Biharmonic Analysis: C. V. Camp 2067

An Infinite Boundary Element Formulation for Three-dimensional Potential Problems: I. Kaljević, S. Saigal and A. Ali 2079

ANNOUNCEMENTS 2101

CONFERENCE DIARY 2103
